

Shaila Kadam (Chair)

My research focuses on soybean seed composition traits mainly protein content. For improving seed protein content of soybean I am going to use different genetic and genomics approaches including CRISPR/Cas.

Harpreet Kaur (Secretary)

My research mainly includes the impact of agriculture best management practices on runoff water quality, soil health, and crop production.

Hua Yang (Treasurer)

My research interest is genomic imbalance in maize and maize functional centromere.

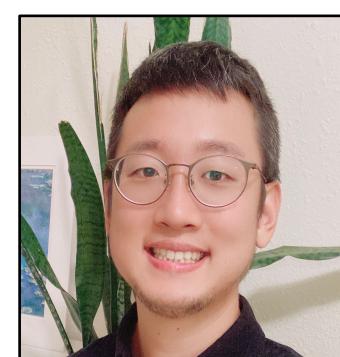

Sanzida Rahman (Symposium event coordinator)

Amelia Griffith (Social event coordinator)

My research focuses on maize root growth in drought conditions.

Dongho Lee (Webmaster)

My research focuses on identifying novel genetic sources for improving soybean carbohydrate profile.
